

# Agenda

## Homework:

- AM
- Input/Output and slope worksheet

## Materials:

- Notebook
- Ruler

## DO NOW:

- Take out homework
- **Solve the following on your desk:**
- Solve for y

$$y = 3x - 2 \text{ when } x = 3$$

$$3x - 2 = x + 8$$

# Do Now

$$y = 3x - 2 \text{ when } x = 3 \qquad 3x - 2 = x + 8$$

$$y = 3(3) - 2$$

$$y = 9 - 2$$

$$y = 7$$

# Slope

The steepness of a line

rise

run

Change in y

Change in x

$y_2 - y_1$

$x_2 - x_1$

# Positive Slope

# Negative Slope

# Zero Slope

# Undefined Slope
