

Input/Output Worksheet and Slope

Complete the equation table. Then graph the equation. Don't forget to connect the points.

1. $y = -2x + 2$

Fill out the table.

x	$y = -2x + 2$	y	(x, y)
-2			
-1			
0			
1			
2			

Type of Slope: _____

Graph the coordinates in the last column of the table.

mathclass.net

2. $y = \frac{x}{3} + 2$

Fill out the table.

x	$y = \frac{x}{3} + 2$	y	(x, y)
-6			
-3			
0			
3			
6			

Type of Slope: _____

Graph the coordinates in the last column of the table.

mathclass.net

3. $y = \frac{-2x}{7} + 3$

Fill out the table.

x	$y = \frac{-2x}{7} + 3$	y	(x, y)
-14			
-7			
0			
7			
14			

Type of Slope: _____

Graph the coordinates in the last column of the table.
