

Input/Output Worksheet (Practice)

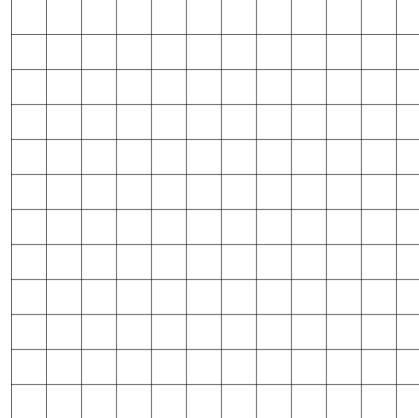

Complete the equation table. Then graph the equation. Don't forget to connect the points.

1. $y = 2x - 2$

Fill out the table.

x	$y = 2x - 2$	y	(x, y)
-2			
-1			
0			
1			
2			

Graph the coordinates in the last column of the table.

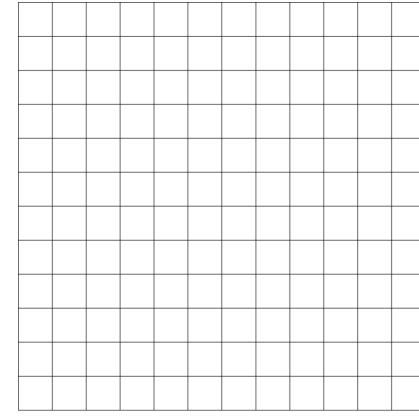

mathclass.net

2. $y = \frac{x}{2} + 2$

Fill out the table.

x	$y = \frac{x}{2} + 2$	y	(x, y)
-8			
-4			
0			
4			
8			

Graph the coordinates in the last column of the table.

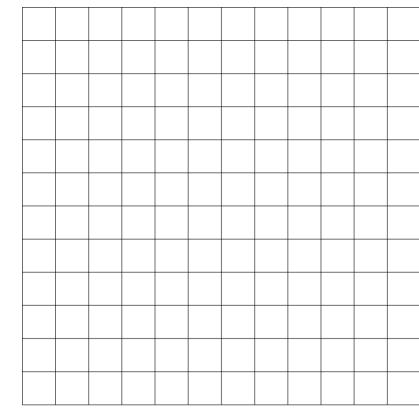

mathclass.net

3. $y = \frac{2x}{5} - 1$

Fill out the table.

x	$y = \frac{2x}{5} - 1$	y	(x, y)
-10			
-5			
0			
5			
10			

Graph the coordinates in the last column of the table.
