

Name: _____

Date: _____ Pd: _____

Linear Functions Tutorial Script

1. Choose a topic (CHECK ONE):

- Option 1:** Determine slope from a graph
- Option 2:** Determine slope from a table
- Option 3:** Determine slope from two points
- Option 4:** Graphing a function in slope-intercept form ($y=mx+b$)
- Option 5:** Creating an equation in slope-intercept form from a graph

2. Create a problem for your topic:

(use the grid below if you chose Option 1 OR Option 5):

3. Introduce yourself in 1-2 complete sentences (include your name and your problem):

4. What is it you are trying to solve? What is the end goal? (1-2 sentences):

5. What are the steps to solve your problem & SHOW work for each of the individual steps (Use the space below the table if needed):

Steps (Be specific and include WHY you did that step if it's applicable)	Show Work:
1)	
2)	
3)	
4)	
5)	

6. Ending message (1-2 sentences):
