

Sample Tutorial Problems:

Option 1: Determine slope from a graph

Option 2: Determine slope from a table

x	y
1	-7
3	-4
5	-1
7	2

Option 3: Determine slope from two points

$(-3, 8)$ & $(7, 6)$

Option 4: Graphing a function in slope-intercept form ($y=mx+b$)

Graph $y = \frac{2}{3}x - 5$

Option 5: Creating an equation in slope-intercept form from a graph

Find the slope-intercept equation of the following graph:
