

Solve the system by GRAPHING.

Be sure to check your work.

$$y = 3x - 4$$

$$y = -\frac{1}{2}x + 3$$

(_____ , _____)

Solve the system. Be sure to SHOW WORK.

$$-3x - 3y = 3$$

$$y = -5x - 17$$

(_____ , _____)

Solve the system. Be sure to SHOW WORK.

$$-6x + 5y = 1$$

$$6x + 4y = -10$$

(_____ , _____)

Solve the system. Be sure to SHOW WORK.

$$-2x + 4y = -6$$

$$-6x - 2y = -4$$

(_____ , _____)
